VETERANS: DOES THIS APPLY TO YOU?

Another objection to cycling has recently been raised. It's claimed that cycling, like wearing tight underpants, leads to sterility. Enthusiasts vigorously deny this. As evidence they tell the story of the man of 75 living in the Pyrenees who was cited simultaneously in paternity suits by girls living in five different villages. He attributed his longevity and virility, not to mention the mobility required by his activities, to his cycling.
